Can't play this game. menu dose not even work, cant change res.. Cheap animations and subpar graphics. I should of known what I was getting into when the game costs just as much as a value meal at Carl's Jr.. Its Really Really Fun I Enjoyed It Even The Bot Practice Was Fun. Check out my gameplay on youtube. The game is very stable from what I can tell. I had a ton of fun playing it and could see this becoming highly addictive. <https://www.youtube.com/watch?v=I9tg67mvKGs&t=1526s>. I recommend this game.. Fun game, enjoy playing it. Would definatly reccomend with such a small price tag.

Man this game, it reminds me of this older game i used to play w/ a few friends called cube3 (another fast fps) and the guns and everything feels nostalgic in a way like the grenade launcher reminds me of the good old quake and the laser rifle reminds me of the sniper rifle from cube3, thank you Francesco Pellaco for the nostalgic gameplay!. Not worth buying because of lack of players. Nice to play, and easy to learn to get good, but with no drive to actually use the skill vs real players, the game fails.. Overall, a pretty good game. It could certainly use an overhaul for graphics and content, but the base game is pretty good. Certainly deserves more attention. Would play far more often if it had a larger player base.. \u0130n general i don't buy games like quake and unreal because i think the genre is pretty much dead and there's not enough to improve and give something new in that genre. "But" when i saw the trailer of the game, the visuals just reeled me in and i wanted to play and give a review to this good and fun looking game.

First of all i want to emphasize that this game reaaalllyy needs to be on VR!! Because that game could be a game changer in fps tournament/Varena genre if it was VR playable with these visuals!!! The music choice is really good for this kind of game "but" it needs a lot of work on sound design cuz the sound effects on weapons and explosions etc. are kinda killing the atmosphere because they sound like if they don't belong there and gives you that uneasy kind of feeling. Definitely needs more maps and play modes but the game is on alpha stage and the developer is taking care of his child for now and i think this game is a hell of a fun!!! (even to a person who is not a fan of these types of fps games)

The game and the developer gives you more than you pay for this game anyways so definitely recommended.... Pros:

- The sound of the plasma gun
- Maps
- A lot of fun for 5 minutes

Contra:

- FPS drops every 15 sec
- You can't dash\u2665\u2665\u2665\u2665\u2665\u2665- Basic 'looking for ammo' type of game
- Control very poor after 'normal' difficulty. (The game is getting so fast that you're left with no chance to survive with such a slow and poor control)
- Achievements doesn't unlock properly, you do something for one, and MAYBE it will unlock after 2-3 minutes

Still i will give a thumbs up, they had good intentions, too bad they made it in lunch-break, it's a game without effort and any brain in it, wait for a sale and give it a try for 5-10 min,. The game is pretty cool but:

- Locked at 62 FPS, if you want to use FREESYNC or GSYNC, you're screwed, it tears really a lot..
 - No borderless fullscreen function, no windowed mode function
 - WHAT IS THE MAIN MUSIC THEME CALLED? I need it!. At 0,99\u20ac get it like i did.
- The game is locked by default at 60fps but there is a workaround, i played the game for 2 hours @ 240hz without any problems.

I will post a video about how to do or make a guide explaining how to remove the 60fps lock if i'm not too lazy. Can't guarantee that but i'll do my best xD. :bigjohn:

Overall it's fun for a one man project, i had this game in sight for a long time, i'm glad i finally got it but i repeat do not pay more than 1\u20ac.

Nobody play it but there are still the bots, so you can still play it.. Its nice to practice your shooting skills on Bots but its nice if there will come more updates like a chat system and a way that more players come. P.S. The achievement that requires a Developer also playing the game is a bit rude.. It is better to delete that achievement because it will be not able to achieve since it feels like the game isnt active in the devoping either. If there are developers active inside the game more then once a week then it might be fine..

Depending on your playstyle I recommend this game only for offline use and to train your shooting skill without players.
